

ABSTRACT OF THE DISCLOSURE

5

This invention relates to an elastomeric composition for use in extruding elastic articles of manufacture which comprises thermoplastic polyurethanes (TPU), polyolefins, styrene-olefins polymers, ethylene-vinyl acetate polymers, maleic anhydride-olefin polymers, and phenolic resins. The elastomeric compositions are particularly useful in
10 extruding these compositions for the preparation of sheets, fibers and fibrous nonwoven fabrics in an extruder attached to an extensional flow mixer.
